

SYDNEY BOYS HIGH SCHOOL MOORE PARK, SURRY HILLS

# 2013

YEAR 12 Mathematics Extension 1 HSC Task #2

# Mathematics Extension 1

#### **General Instructions**

- Reading Time 5 Minutes
- Working time 90 Minutes
- Write using black or blue pen. Pencil may be used for diagrams.
- Board approved calculators maybe used.
- Each Section is to be returned in a separate bundle.
- Marks may **NOT** be awarded for messy or badly arranged work.
- All necessary working should be shown in every question.
- Answers must be given in simplest exact form unless otherwise stated.

#### Total marks - 65

#### **Multiple Choice Section (5 marks)**

• Answer Questions 1-5 on the Multiple Choice answer sheet provided.

#### Sections A, B and C (60 marks)

• Start a new answer booklet for each section.

Examiner:

D.McQuillan

## **STANDARD INTEGRALS**

$$\int x^n dx = \frac{1}{n+1} x^{n+1}, n \neq -1; x \neq 0, \text{if } n < 0$$

$$\int \frac{1}{x} dx = \ln x, x > 0$$

$$\int e^{ax} dx = \frac{1}{a} e^{ax}, a \neq 0$$

$$\int \cos ax dx = \frac{1}{a} \sin ax, a \neq 0$$

$$\int \sin ax dx = -\frac{1}{a} \cos ax, a \neq 0$$

$$\int \sec^2 ax dx = \frac{1}{a} \tan ax,$$

$$\int \sec ax \tan ax dx = \frac{1}{a} \sec ax, a \neq 0$$

$$\int \frac{1}{a^2 + x^2} dx = \frac{1}{a} \tan^{-1} \frac{x}{a}, a \neq 0$$

$$\int \frac{1}{\sqrt{a^2 - x^2}} dx = \sin^{-1} \frac{x}{a}, a > 0, -a < x < a$$

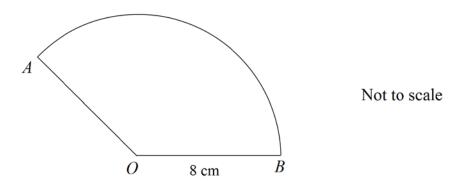

$$\int \frac{1}{\sqrt{x^2 - a^2}} dx = \ln \left(x + \sqrt{x^2 - a^2}\right), x > a > 0$$

$$\int \frac{1}{\sqrt{x^2 + a^2}} dx = \ln \left(x + \sqrt{x^2 + a^2}\right)$$
NOTE: 
$$\ln x = \log_e x, x > 0$$

# Multiple Choice Section (5 marks)

Use the multiple-choice answer sheet for Questions 1-5

1 AOB is a sector of a circle, centre O and radius 8 cm. The sector has an area of  $20\pi$  cm<sup>2</sup>.

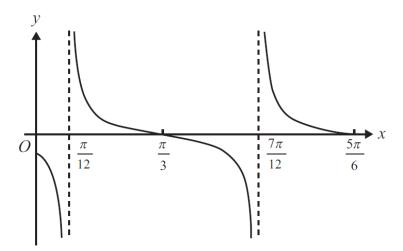

What is the arc length of the sector?

- (A)  $2\pi$
- (B) 5*π*
- (C) 8π
- (D) 10π

2 How many ways can 3 boys and 2 girls be arranged about a circular table?

- (A) 12
- (B) 24
- (C) 60
- (D) 120

3 Part of the graph of y = f(x) is show below

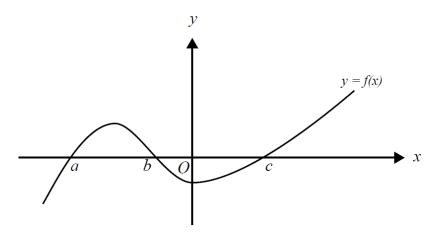

f(x) could be

- (A)  $y = -\tan\left(2x \frac{\pi}{6}\right)$
- (B)  $y = -\tan\left(2x \frac{\pi}{3}\right)$
- (C)  $y = \cot\left(2x \frac{\pi}{12}\right)$
- (D)  $y = \cot\left(2x \frac{\pi}{6}\right)$

- 4 On a particular day, the temperature y, in degrees Celsius, can be modelled by the function with equation  $y = 18 5 \sin\left(\frac{\pi t}{12}\right)$ , where t is the time in hours after midnight. The maximum temperature for this particular day occurs at
  - (A) 3.00 am
  - (B) 6.00 am
  - (C) 12.00 noon
  - (D) 6.00 pm

5 Part of the graph of the function f(x) is shown below.

The total area, bounded by the curve of y = f(x) and the x-axis on the interval  $a \le x \le c$ , is given by

- (A)  $\int_a^c f(x) dx$
- (B)  $\int_a^b f(x) \, dx + \int_b^c f(x) \, dx$
- (C)  $-\int_{a}^{0} f(x) dx + \int_{0}^{c} f(x) dx$

(D) 
$$\int_a^b f(x) \, dx + \int_c^b f(x) \, dx$$

# **End of Multiple Choice Section**

# Section A

Start a new writing booklet for each section

# Question 6

(a) Find

(i)

$$\int \frac{x^4}{7} dx$$

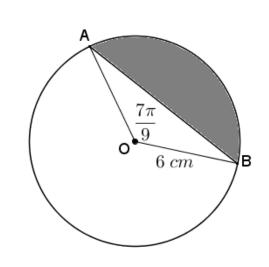

(ii)

$$\int \frac{7}{x^4} dx$$

(b) Evaluate

$$\int_{1}^{2} 2t(t^2-1)dt$$

- (i) Find the length of the minor arc AB.
- (ii) Find the area of the shaded segment.

[3]

[2]

[3]

(d) A restaurant offers these choices:

ENTRÉE	MAIN COURSE	DESSERT	
Garlic prawns	Fillet steak	Strawberries	
Soup of the day	Chicken	Apple pie and cream	
Oysters	Fish		

- (i) How many different 3 course dinners can be chosen?
- (ii) If I was late and someone ordered for me what is the probability that they would choose what I wanted, assuming they knew I did not like oysters?

#### **Question 7**

- (a) Sketch the graph of  $y = 1 \cos(\pi x)$  on the domain  $-1 \le x \le 2$ . [3]
- (b) Find the area of the region in the first quadrant bounded by the graphs of  $y = \frac{1}{8}x^3$  and y = 2x. [4]
- (c) [4](i) How many arrangements can be made with the letters of the word ARRANGE?
  - (ii) How many arrangements can be made with the letters of the word ARRANGE if the R's must remain together?

## **End of Section**

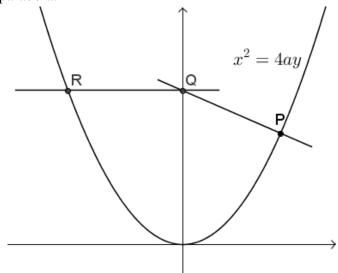

## **Section B**

Start a new writing booklet for each section

#### **Question 8**

- (a) Use the Trapezoidal Rule, with 3 function values, to approximate the volume generated by rotating  $y = \sin x$  about the x-axis between x = 0 and  $x = \frac{\pi}{2}$ . [4]
- (b) The diagram below shows the graph of the parabola  $x^2 = 4ay$ . The normal to the parabola at the variable point  $P(2at, at^2), t > 0$ , cuts the *y*-axis at Q. Point R lies on the parabola.

[6]

- (i) Show that the equation of the normal to the parabola at P is  $x + ty = at^3 + 2at$ .
- (ii) Find the coordinates of R given that QR is parallel to the *x*-axis and  $\angle PQR > 90^{\circ}$ .
- (iii)Let M be the midpoint of RQ. Find the Cartesian equation of the locus of M.

## **Question 9**

- (a) A committee of 6 is to be chosen from 8 men and 6 women so as to contain at least 3 men and 2 women. [4]
  - (i) In how many ways can this be done?
  - (ii) In how many ways can it be done if 2 particular men refuse to serve together?
- (b) Use induction to prove that if n is positive and odd, then 4<sup>n</sup> + 5<sup>n</sup> + 6<sup>n</sup> is divisible by 15.

# **End of Section**

## Section C

Start a new writing booklet for each section.

#### **Question 10**

- (a) Show that Newton's method fails when applied to the equation  $\sqrt[3]{x} = 0$  with any initial approximation  $x_1 \neq 0$ . [3]
- (b) A grain silo consists of a cylindrical main section, with height 8 metres, and a hemispherical roof.

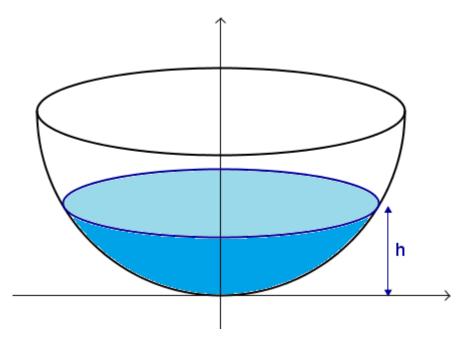

[6]

- (i) In order to achieve a total volume of 60 m<sup>3</sup> (including the part inside the roof section) show that one of the solutions of  $\pi r^3 + 12\pi r^2 90 = 0$  is the necessary radius, *r*, of the silo.
- (ii) Use Newton's method with a first approximation of radius  $r_1 = 1$  metre to find the third approximation,  $r_3$ , to 3 decimal places.

#### **Question 11**

(a)

- (i) Show that the equation of the lower semi-circle with centre (0, 20) and radius 20 is  $y = 20 \sqrt{400 x^2}$ .
- (ii) Find the volume of the solid generated by rotating the semi-circle around the y-axis between the points y = 0 and y = h.

- (iii) If  $171\pi$  cm<sup>3</sup> of water is poured into a semi-circular bowl with radius 20 cm. What will be the height of the water in the bowl?
- (b) Suppose that three points on the parabola  $y = x^2$  have the property that their normal lines intersect at a common point. Show that the sum of their *x*-coordinates is 0.

[4]
